

Author's name	Title of the communication	Page number
COTTER P.	Microbial diversity of fermented foods	15
PAPADEMAS P.	WG2 Cartography of the current place of FF in the diet of COST Actio Countries	16
MAGRIPLIS E.	Mapping Fermented Food Intake: Development of the Fermented Foods Frequency Questionnaire (3FQ)	17
GAPP C., GRIZON A.	Top-down and bottom-up ecological engineering for the selection of autochthonous ferments for cheese production	18
CAPOZZI V.	Italian Fermented Foods with a Geographical Indication status: cheese, bread, table olive, semi-dry sausage, and wine	19
RENARD B.	One process applied to different cereals leads to specific microbial profiles: the case of traditional fermented couscous from Senegal.	20
MAYO B.	Microbial diversity in the blue-veined Cabrales cheese by culturing and metataxonomics	21
BORONAT NIELSEN O.	Enhancing Food Aromas Through Novel Fermentations of Upcycled By-Products	22
CRETENET M.	Is Frenc cider a bad wine ?	23
ISLETEN HOSOGLU M.	Fermentation of microalgae as a way to increase the implementation of algae-based products in food industry	24
PERTZIGER E.	Dietary Intake of Live Microorganisms and Fermented Foods in Swiss Adults	25
SEZER E.	Incorporating Spore-Forming Probiotics and Dietary Fibers in Ice Cream Production	26
CERTIK M.	New types of fermented-based foods: challenge for fungal solid-state fermentation?	27
ALAKOMI H.-L.	Effect of fermentation on cultured coffee cell cultures	28
BODAKOWSKA-BOCZNIEWICZ J.	Fermentation and debittering of grapefruit juice	29

BÜTIKOFER U.	Effect of dairy and fermented food diet on the urinary metabolome of young and elderly men – a controlled, crossover intervention study	30
WILLANE C. T.	The nutritional composition of main fermented foods from Senegal	31
DE VIVO A.	The MetaOlive project: meta-omic approaches for traditional table olive fermentation	32
DELBES C.	Drivers of dairy farm microbiomes under changing climate and farming practices, and implications for the microbiome of raw milk cheese	33
DELIA E.	From Tradition to Trend- Exploring Albanian Students’ Perceptions of Fermented Foods	34
ESATBEYOGLU T.	The effect of cold plasma on the bioaccessibility of phenolics in red cabbage pickles	35
ESTRADA O.	The power of fermentation to transform fruit and vegetable juices	36
GARCIA-GUTIERREZ E.	Characterisation of Murciano-Granadina goat milk kefir	37
GIL-FLORES P.	Delving into the development of Lachancea thermotolerans x Candida boidinii (Lt x Cb) hybrids to improve table olive fermentations	38
GOMES LOBO C. J.	Multiobjective Optimization of Lactic Fermentation of Murta Juice: An Innovative Approach with Lactobacillus Monocultures and Cocultures	39
LARANJO M.	Shared Fermented Food Heritage of Portugal and Spain	40
GORSKA K.	The production of tannase by probiotic bacterial strains and its application in the food industry	41
HARSA H. S.	Development of Artisanal Probiotic Yoghurt Using Novel Starter Cultures from Turkiye	42
HURTADO-MURILLO J.	Effect of lactic acid fermentation on plant-based protein hydrolysis in quinoa and chickpea blended beverages	43
MEDINA PRADAS E.	Optimization of the fermentation process of caperberries	44

MILCARZ A.	Solid-state fermentation: A promising approach to producing meat analogues	45
NAKOV G.	Development of gluten free sourdough bread enriched with olive pomace	46
NARBAD A.	Microbial diversity and characterisation of microbial strains isolated from local sauerkraut	47
LAGO M.	Desirability function-based optimization of apple pomace extraction for the production of a fermentable must for the development of NoLo beverage using central composite design methodology (CCD)	48
PARENTE E.	Yeasts association networks in fermented alcoholic beverages	49
PAVELJSEK D.	Effects of fermentation conditions on kefir's sensory, chemical and microbial profiles	50
PEMAJ V.	Establishing a mini cheese system for monitoring the fermentation and quality of white brine cheese	51
RENARD M.	Isolation and identification of potential starter cultures for oat fermentation	52
RICCIARDI A.	The fungal microbiota of table olives: a survey.	53
SARAND I.	Selection of potential starter bacteria for carrot juice fermentation	54
STAROWICZ M.	Effect of various strains usage on profile of volatile organic compounds (VOCs) in fermented bee products	55
TALJIC I.	Fermented Foods as a Staple Food in the Sustainable Healthy Diet	56
TRAJKOVSKA B.	Impact of Bioprotective Cultures on Yogurt Properties During Storage and Post-Opening Refrigeration	57
VIDOVIC B.	Prevalence of fermented foods consumption in a Serbian young adult population	58
VILKAITIS G.	The role of Lactococcus lactis small non-coding RNAs in response to antimicrobial stress	59

VIVEROS LIZONDO N.	Selection of a starter culture for the production of a fermented beverage (mead)	60
WOJCIECHOWICZ-BUDZISZ A.	Effect of Quinoa Variety and Malt Addition on the Fermentation Characteristics, Quality, and Health-Promoting Properties of Wholemeal Quinoa Sourdoughs	61
ZDOLEC N.	Lactic acid bacteria diversity of traditionally produced hen meat fermented sausage	62
RANTSIOU K.	Microbial safety aspects of fermented foods	64
ASSUNÇÃO R.	From Health Impact to Green Choices: The Dual Impact of Fermented Foods	65
NIKOLOVSKA NEDELKOSKA D.	The impact of fermentation on acrylamide levels and bioactive profile of pumpkin and soft wheat composite bread	66
CIESAROVA Z.	Is fungal solid-state fermentation a safe method for food valorization in terms of acrylamide formation?	68
BOGOVIC MATIJASIC B.	New insights into the safety of fermented dairy products by analysing resistomes	69
LARANJO M.	Farm-to-fork transmission of antimicrobial resistance genes in fermented pork sausages	70
QUINTANILLA-CARVAJAL M.	Antimicrobial Activity of Fermentation Metabolites Produced by <i>Limosilactobacillus fermentum</i> K73 Isolated from Costeño Cheese Against <i>Shigella</i> spp., <i>Escherichia coli</i> , and <i>Salmonella</i> spp.	71
BOUTINE A.	Revolutionizing Food Safety: Breakthroughs in Bacteriocinogenic Ferments from Spontaneously Fermented Mediterranean Foods	72
DALMASSO M.	Exploring the unknown: are phages present in cider?	73
GANDIA M.	BEFERMED project: Development of fermented beverages from local Mediterranean plant-based raw materials	74

BAUTISTA-GALLEGO J.	OLIVEPACK: Natural and biobased antimicrobial packaging materials to increase the shelf life of naturally fermented low-salt table olives	75
KONUCHOVA M.	Innovative Approaches to Fermented Foods: Inhibitory Effects of LAB on <i>Candida parapsilosis</i>	76
KUKUROVA K.	Amino Acid Profile in Legumes Fermented with Filamentous Fungi	77
MARKIEWICZ L.	The effect of milk protein variants and yoghurt starters on the immune status of the intestinal epithelium treated with fermented milk beverages	78
MILICEVIC J	Chlorantraniliprole, methomyl, metalaxyl and thiacloprid pesticides: in silico investigation and their determination in pickles using QuEChERS methodology and HPLC-DAD	79
VERBEKE K.	Impact of fermented foods on cardiometabolic health – an overview of the human studies within the Horizon Europe project Healthferm	81
SESSITSCH A.	MICROBIOMES4SOY - Healthier diets and sustainable food/feed systems through employing microbiomes for soya production and further use	82
CAPOZZI V.	Preservation of Microbial Consortia Associated with Fermented Foods: Apulian Table Olives as Case Studies	83
DE FILIPPIS F.	Traditional Fermented Foods as a source of beneficial microbes: a metaanalysis	84
DI CESARE F.	A genomic approach to non-conventional yeasts as bioresources for innovation in food and beverage fermentation: genus <i>Mrakia</i> as a case study	85
FRAGASSO M.	Polyphasic characterisation of lactic acid bacteria diversity associated with 'Gentile di Puglia' sheep milk: multi-strains starter culture for cheese and cross-over cereal-based fermented beverage	86

HOXHA L.	Harnessing Winery and Distillery By-Products with <i>Aspergillus oryzae</i> : Potential for development of innovative fungi-based fermented food and feed	87
RUIZ GARCIA L.	Exploration of lactic acid bacteria properties to design fermented flours enriched in prebiotic arabinoxylooligosaccharides from hemicellulosic agricultural by-products	88
SORIANO A.	Sustainability and health as drivers of the rational design of fermented foods: brewer spent grain and pot ale as microbial resources to innovate in non-alcoholic beer brewing	89
HUTKINS R.	Dietary microbes: Persistence in the gut and impact on health	91
MUKHERJEE A.	The impact of consumption of live dietary microbes on health: a scoping review	92
MORENO-INDIAS I.	Effect of Moderate Consumption of Different Phenolic-Content Beers on the Human Gut Microbiota Composition: A Randomized Crossover Trial	93
KAZANTSEVA J.	The Effect of Fermented Vegetables on Human Health and Gut Microbiota	94
SAVARY-AUZELOUX I.	Development of a fermented food with validated beneficial impact on health: a case study with a cheese including a <i>Lactocaseibacillus casei</i> capable to enhance muscle insulin sensitivity.	95
BÄR C.	A new strategy for the development of functional fermented foods to support human health A new strategy for the development of functional fermented foods to support human health	96
PAPADIMITRIOU K.	A multi-omics approach to study different Greek PDO fermented foods and wines	97
KOPER J.	In vitro human gastrointestinal digestibility and colonic fermentation of whey, casein and edible yeast-based proteins	98

VALENTINO V.	Grana Padano and Parmigiano Reggiano cheeses microbiomes exhibit neuroactive potential and bioprotective activities	99
ALVARADO JASSO G. M.	Enrichment of sourdough with probiotic strains: impact on microbiological and physicochemical properties	100
ATANASOVA-PANCEVSKA N.	The Antimicrobial Properties of Different Strains of Yeasts Isolated from Commercial and Homemade Kefir from North Macedonia and Their Characterization as Potential Probiotics	101
FARSI D.	A review of the current evidence base for the health benefits of the cultured dairy food cottage cheese	102
GARCIA ACOSTA N.	Comparative phenolic composition of the fermented pomegranate juice by lactic acid bacteria and their antioxidant capacity	103
GUZEL M.	Sourdough Enhances Functional and Technological Properties of Gluten-Free Sorghum Bread	104
HILLESHEIM E.	Effects of fermentation and age on postprandial responses to milk and yogurt in young and older men	105
JORDAN ROMERO M.	Benefits of unfermented and fermented pomegranate juice on redox status in human colonic cells	106
KLEMPOVA T.	Valorisation of legumes using the fungal solid-state fermentation	107
LAMBRECHTS E.	An optimised procedure to prepare pre-digested (fermented) foods for studying their impact on gut microbiota during in vitro colon fermentation	108
PAPADEMAS P.	Novel whey fermented beverage enriched with a mixture of juice concentrates: evaluation of antimicrobial, antioxidant and ACE activities before and after simulated gastrointestinal digestion	109
PAVLOSKI I.	Exploring the probiotic potential of Boza, a traditional fermented drink	110

PEÑAS E.	Development of a health fermented beverage from oat suitable for individuals with celiac disease	111
PEROTTI S.	Comparative microbial and functional characterization of kombucha from different starter SCOBYs	112
RUD I.	Probiotic survival and impact on gut microbiota and metabolites during in vitro fermentation	113
SALAS-MILLAN J. A.	Lactofermentation of agricultural waste (broccoli leaves) as a strategy for the extraction of phytochemicals with health-promoting bioactivities	114
SALVETTI E.	Enhancing Functional Health Properties of Blueberry Juice via Probiotic Fermentation	115
SANTA D.	Health effects of ethnic fermented foods	116
SYRPAS M.	Nutritional changes during fermentation of phycobiliprotein-rich extracts from <i>Arthrospira platensis</i>	118
TELESZKO M.	The use of infusions from mulberry, raspberry, nettle and rooibos leaves to obtain fermented kombucha-type beverages	119
VERDONCK C.	Insights into the impact of sourdough starter culture and breadmaking process on wholemeal bread properties linked with starch digestion	120
VITALI M.	Impact of lactic acid fermentation and in vitro gastrointestinal digestion on the phytochemical profile and antioxidant capacity of rice, tiger nut, and carob plant-based beverages	121
WILK M.	Kombucha beverages from white, green, red, and black teas- physicochemical characterization and antioxidant potential	122
COCOLIN L.	The challenge of microbiome preservation and storage: the case of fermented sausages	124
BLONTROCK E.	Impact of fermentation of oats with varying endogenous enzyme activity levels on the extractability of its proteins and dietary fibres	125

CORVINO A.	Direct Injection Mass Spectrometry for the Real-Time Volatilomics in Food System Microbiomes: the Potential of Providing Temporal Dimension in Multi-Omics Studies	126
GARCIA-CALVO L.	Fermented vegetables: The path to increased demand and innovation in Norway (FermGrønt)	127
GIRIJA A.	Exploring the microbial dynamics of Gluten free teff sourdough starter culture	128
KÜTT M.-L.	Fermented oils – the sustainable novel ingredient assessment on lipid characterization platform	129
MAGRIPLIS E.	Repeatability of the online Fermented Foods Frequency Questionnaire (3FQ) for the assessment of fermented foods consumption patterns across European regions. Preliminary results	130
MANTZOURIDOU F.	Metagenomic and volatilomic approaches to monitor bacterial community and volatilome changes in brine during the spontaneous fermentation of Spanish style cv. Chalkidiki green table olives	132
MATEJCEKOVA Z.	Growth responses of Lacticaseibacillus rhamnosus GG in oat-based milk alternative as a function of temperature	133
TSAKALIDOU E.	Application of the probiotic strain Levilactobacillus brevis ACA-DC 1705 in sour beer production	134
